Every four years the San Diego Region's official transportation plan is updated. This plan determines how billions of local, state and federal tax dollars are spent in our region for auto and public transit systems and services. The San Diego Association of Governments (SANDAG) is reaching out to underserved populations in North County, for opinions on this effort. Clients specifically are desired to attend, as well as representatives from your agency serving clients.

Transportation access to work, school, and services is vital to the well-being of our populations. Please save this date and time; please work on how your clients may be able to attend this workshop, including their transportation access TO this event.
