

Sept. 25, 2019

4:30 pm Appetizers and networking

5 – 6 pm Presentation

Exploring Patient Family Engagement in Rapid Precision Medicine

Speaker:

Libby Hoy

Founder / CEO PFCC Partners

Rady Children's Hospital

Education Office Building

7960 Birmingham Drive

San Diego

What can we learn from listening to the families of the children impacted by precision medicine interventions like genomic sequencing? Patient Family Engagement is an active strategy for improving outcomes across the healthcare continuum, from the bedside to health system operations, research teams, quality improvement programs and health systems operations and policy. Listen to the story of one family's diagnostic journey and how that has led to a lifetime of work to implement the infrastructure to support partnerships with patients and their family caregivers in unique settings.

Free Parking. No cost to attend.
