COVID-19 VACCINES: STEPS FOR SUCCESS

California Department of Social Services
Community Care Licensing Division
Adult and Senior Care Program

Vaccinate ALL 58
Together we can end the pandemic.

Presented by California Disability Services Association & Easterseals of Southern California | DisabilityThriveInitiative.org
IMPORTANT NOTES

- Current timeline for vaccination tiers, allocation and access.
- Explanation of vaccine hesitancy and readiness - getting the vaccine.
- Distinguishing between COVID-19 symptoms and post vaccine symptoms.
- Side effect monitoring plans.
WHY VACCINATION NUMBERS MATTER

If only SOME get vaccinated...
the COVID-19 virus spreads.
If MOST get vaccinated...
the COVID-19 virus is contained.

- Red: Non-vaccinated, sick, contagious
- Gray: Healthy, non-vaccinated
- Blue: Healthy, vaccinated
VACCINE HESITANCY

Those who are hesitant to receive the vaccine are more likely to be:

• Women
• Under 55
• From low-income backgrounds
• Non-college-educated
• Rural residents
• Black and Latino/a communities
REASONS FOR VACCINE HESITANCY

From CVS/ Omnicare study:

• Seems rushed/ too early
• Not sure if it’s effective
• Don’t trust it/ don’t believe it’s safe
• Nervous about it/ afraid of side effects or long-term effects
• Too much politics involved or too much propaganda
PROMOTING VACCINE CONFIDENCE

• Start by **LISTENING to** concerns and fears. Don’t argue or defend.
• Provide written material on vaccine effectiveness and safety in multiple languages
• Promote positive testimonials from facility leaders, respected staff, other residents (with permission) and community members, etc.
• Schedule regular check-ins around time of vaccination with residents' loved ones/families for reassurance.
• Use good judgement when providing education. Avoid educating when unwanted or without asking first.
WHO IS GETTING VACCINATED NOW

Phase 1A

Now Vaccinating:
• Healthcare workers
• Long Term Care Residents

Phase 1B

Now Vaccinating:
• Individuals 65 and older
• People working in specific sectors:
  o Education and childcare
  o Emergency services
  o Food and agriculture
NEW GROUP FOR VACCINATION (1 OF 2)

Beginning March 15, healthcare providers may use their judgement to vaccinate certain people aged 16-64. These people must be at the very highest risk for serious illness and death from COVID-19 as a direct result of one or more of the following severe health conditions:
SEVERE HEALTH CONDITIONS

- **Cancer**, current with debilitated or immunocompromised state (weakened immune system)
- **Chronic kidney disease**, stage 4 or above
- **Chronic pulmonary disease**, oxygen dependent
- **Down syndrome**
- **Immunocompromised state from solid organ transplant**
- **Pregnancy**
- **Sickle cell disease**
- **Heart conditions**, such as heart failure, coronary artery disease, or cardiomyopathies (excludes hypertension)
- **Severe obesity** (Body Mass Index $\geq 40$ kg/m²)
- **Type 2 diabetes mellitus** with hemoglobin A1c level greater than 7.5%
NEW GROUP FOR VACCINATION (2 OF 2)

A person with developmental or other severe high-risk disability may be vaccinated if one or more of the following applies:

• The individual is likely to develop severe life-threatening illness or die from COVID-19 infection

• Getting COVID-19 will limit the individual's ability to receive ongoing care or services vital to their well-being and survival

• Providing adequate and timely COVID care will be particularly challenging because of the individual's disability
“…This letter certifies that you, as the addressee, are a recipient of In-Home Supportive Services (IHSS) and meet the criteria. Therefore, you are eligible for vaccination beginning March 15, 2021, and as vaccine supply is available…”
OPTIONS FOR GETTING THE VACCINE

There are five main ways you may be able to find an appointment:

1. Health Care Provider
2. Pharmacy
3. Local Health Department
4. Community Pop-Up Clinic
5. Online or by Phone

On-line at www.myturn.ca.gov.

- The MyTurn website is accessible to people with disabilities and in eight languages: English, Spanish, simplified and traditional Chinese, Arabic, Tagalog, Vietnamese, and Korean.

Calling the COVID-19 Hotline at:
1-833-422-4255 or 1-833-4CA-4ALL (M-F 8AM-8PM, Sa-Su 8AM-5PM).

- The Hotline is accessible to people with disabilities and offers services in English and Spanish, with connections to interpretation services in more than 250 languages.
PREPARING FOR THE VACCINE

• Lead with compassion, assurance and education. Avoid shame and intimidation tactics.
• Include vaccinations in care planning for residents.
• Collect information that pharmacies need.
• Set up a process for tracking who will be vaccinated (if you are a provider serving multiple consumers)
• Make arrangements to take consent (assent) into account: e.g., print Emergency Use Authorization (EUA) fact sheet.
• Please follow these guidelines:
  o Make sure you are not sick or feeling ill
  o Stay hydrated, and no alcohol the night before
  o Wear loose fitting clothing
  o Write down any questions you may want to ask
PREPARING FOR VACCINATION (PEOPLE WITH SEIZURES)

- Vaccination may trigger a seizure

- Be prepared with anti-seizure medications
  - Some clients may need pre-medication with Lorazepam orally
  - Others may need Diastat (rectal diazepam) after vaccination for treatment of seizures

- Work with a neurologist to **develop** a plan for each person with a seizure condition
VACCINE SIDE EFFECTS

Occur within the first 3 days of vaccination
• Day 1 = Day of vaccination
• Should resolve within 1-2 days

More common and severe after the second dose and among people younger than 55 years old

Side effects are a positive sign! They indicate that the immune response is working!
MOST COMMON VACCINATION SIDE EFFECTS

In Younger People
• None
• Sore arm
• Fatigue
• Headaches
• Body aches
• Fever
• Stomach Upset

In Older People
• None
• Sore arm
• Fatigue
• Fevers
  o Short-lived mild to high
  o Fever = temperature of 100.0°F or higher
  • Staff with fevers should not work and should be evaluated
POST VACCINATION MONITORING

Make a side-effect monitoring plan

Check in and follow up with participants/caregivers

Why?

- To decide if symptoms are: vaccine side effects, COVID-19, or unclear (could be either)
- To avoid unnecessary testing or quarantine if they don’t have COVID-19
- To keep people with COVID-19 from giving it to others
STAFFING PLAN

• Tell staff about side effects and how to handle them

• Develop a strategy to provide timely assessment of staff with symptoms

• Offer paid sick leave for staff with symptoms to remove barriers in reporting

• Have a back-up plan for staffing in case staff call in sick (especially after 2nd shot)
REPORT SIDE EFFECTS!

Use **V-safe** to report ANY signs and symptoms to the CDC

To sign up for v-safe, follow instructions on v-safe information sheet given during vaccination clinic
POSITIVE COVID-19 TEST = COVID-19

A positive COVID-19 test is **NOT** from the vaccine

Only a person who has COVID-19 will test positive for COVID-19!
COVID-ONLY SYMPTOMS

Cough, shortness of breath, runny nose, sore throat, loss of taste or smell

Follow usual COVID-19 protocol

- Isolate
- Full Personal Protective Equipment (PPE) for contacts
- COVID-19 test

Staff:
- Cannot work
- Must get tested
IS IT COVID-19 OR A VACCINE SIDE EFFECT?

Fever, fatigue, headache, chills, muscle aches, joint aches
You can’t tell at first!

Participants:
- Quarantine and monitor
  - Consider PPE and COVID-19 testing
- If symptoms are gone in 2 days
  - Resume normal activity once symptom free for 24 hours

Staff:
- Can work IF no fever, feel well enough, willing & no COVID-only symptoms
SIDE EFFECTS OR COVID-19?

**Vaccine ONLY**
- Local pain swelling, allergic reaction (within minutes)

**COVID-19 ONLY**
- Cough, shortness of breath, runny nose, sore throat, loss of taste or smell

**Both**
- Fever, fatigue, headache, chills, muscle aches, joint aches

ALTERATIVE SERVICES

DDS Directive, August 31, 2020

• "Alternative Nonresidential Services Model (Alternative Services)
Providers of nonresidential services, as defined in Title 17 section
54302(a)(49), may utilize Alternative Services, if needed, to meet a
consumer’s service needs. When providing services to consumers during
the COVID-19 State of Emergency, providers shall be creative, resourceful
and make modifications as needed to how existing services are delivered.
Any Alternative Services used shall be responsive to each consumer’s
current needs and be mindful of the importance of safety during the
COVID-19 State of Emergency, including compliance with applicable state
and local health orders and licensing requirements. Details on
implementation of Alternative Services are in Section V of this Directive."
ELIGIBLE ALTERNATIVE SERVICES (1 OF 2)

Alternative Services shall include the following:

a. Supports related to minimizing the exposure to or impact of COVID-19 on the consumer;
b. Completion of an individual assessment of skills, preferences, and service needs for the consumer;
c. Completion of an individualized service plan to provide needed services for the consumer;
d. Alternative services delivered to the consumer via telephone, video or other electronic communication;
e. Delivery of supplies or other items to the consumer’s home needed to provide services or supports;
f. Use of self-guided training and educational materials supplied to the consumer by the provider intended to support the consumer’s service;
g. Skills training to individuals within the consumer’s household who are specifically designated to support the consumer;
h. Alternative services provided in-person at the consumer’s home, in a community setting, or at the provider’s facility, modified to comply with the most protective state or local COVID-19 safety guidelines in effect at the time the service is to be delivered;
   • Provider staff must be trained on COVID-19 safety precautions prior to the delivery of in-person services.
i. Supports for transition to the Self-Determination Program; and
j. Other modifications to nonresidential services that are approved by the consumer that further or achieve his or her service needs.
ELIGIBLE ALTERNATIVE SERVICES (2 OF 2)

Alternative Services shall include the following:

a. Supports related to minimizing the exposure to or impact of COVID-19 on the consumer;

d. Alternative services delivered to the consumer via telephone, video or other electronic communication;
Provider staff should receive training necessary for Alternative Services. This training may include, but is not limited to, the following:

a. COVID-19 safety precautions for both staff and the consumer;

b. Delivering services using the person-centered planning and approach criteria set forth in Title 42, Code of Federal Regulations section 441.540;

c. Informed decision-making so that consumers can understand what choices they have in receiving services and understand the benefits, risks and responsibilities associated with the service choices available to them;

d. Self-Determination Program requirements;

e. Developing written materials using plain language that can be readily understood by consumers;

f. Using alternative communication technology, tools or methods to deliver services;

g. Delivering services in a manner accommodating the cultural and linguistic needs of the consumer; or

h. Use of technology utilized to deliver services.
Provider staff should receive training necessary for Alternative Services. This training may include, but is not limited to, the following:

a. COVID-19 safety precautions for both staff and the consumer;

c. Informed decision-making so that consumers can understand what choices they have in receiving services and understand the benefits, risks and responsibilities associated with the service choices available to them;
Provider staff should receive training necessary for Alternative Services. This training may include, but is not limited to, the following:

e. Developing written materials using plain language that can be readily understood by consumers;

f. Delivering services in a manner accommodating the cultural and linguistic needs of the consumer;
Q12. Can Alternative Services include assistance with accessing the COVID-19 vaccine? (New 03/22/21)

A12. Yes. Assistance could include providing information about the vaccine, eligibility for vaccination, where to obtain a vaccine, and coordinating transportation
COVID-19 VACCINATION

APPOINTMENT RIDE OPTIONS

For People with Developmental Disabilities

As of March 15, individuals with developmental disabilities age 16 years and older, are now eligible for COVID-19 vaccinations at County vaccination sites. Need a ride to your vaccination appointment? See below for options available to you.

Home of Guiding Hands

Provides free transit rides to and from Super Vaccination stations, hospitals, and other community immunization locations. Proof of COVID-19 vaccination appointment is required. Customers can call (619) 938-3060 to schedule a ride to drop-off locations only (not drive through).

Facilitating Access to Coordinated Transportation (FACT)

Provides rides to and from vaccination sites for a small fee. Available for walk through sites only. Drop-off and pick-up rides must be scheduled separately. Call (888) 924-3228 to schedule a ride.

DON’T FORGET:
