21. What contributions qualify for the In-Kind Match? What counts as 'in-kind' costs?

Matching funds include:

- Non-federal public or private funds
- Funds that are not used as match for any other federal program
- Unrecovered indirect costs

- Either cash or in-kind, fairly evaluated**

In other words, match can be either an actual expenditure (cash) or a virtual cost (in-kind contribution). In-kind match contributions come from the grantee organization. In-kind match typically provided in the form (assigned value) of personnel, goods, and services, including direct and indirect costs. Third party in-kind match contributions come from other non-federal third parties. Third party in-kind match contributions come in the form (assigned value) of personnel, goods, and services (including direct and indirect costs). Grantees and third parties must document the contributed resource of value, using receipts, payroll records, etc.

The most common type of match, and the easiest to track, is cash match. Cash match is either the grantee organization's own non-federal (general revenue) funds or cash donations from non-federal third parties (e.g., partner organizations), or by non-federal grants. A cash match is an actual cash contribution.

22. Does the Match Requirement mean that my organization has to provide a percentage of the money/cash for the project? My organization just uses volunteers and has no fiscal budget; does this mean we will not qualify?

The match may be in-kind or cash, with appropriate documentation for the resources provided.

23. Can you clarify what the Match Requirement is again (e.g. L.A County)?

A match of 25% is required for Non-Poverty Areas and a 10% match is required for Poverty Areas in which services will be provided. A 'poverty area' is typically defined as that in which 20% or more of the population lives below the established poverty level. Poverty levels, by county, can be found at: [Exhibit A California Poverty Levels by County 2021](#)

24. Is there a percentage limit on administrative costs?

No, there is no percentage limit, as long as the basic requirements are met.
